Price Increases

There are still widespread price increases occurring in a large portion of the products we deal with—Sugar price increases are having a substantial knock on effect on Hot Chocolate and Biscuits. In addition the price increases we made in July for Lavazza and our own coffee products are still filtering through—the sheer volume of prices to check and increase accordingly has made this a mammoth task—so you might still notice a price change even now—there is only ever one increase per product—some are just very delayed.

Vegware Disposable Cups

We have found a supplier of double wall cups which are fully compostable, sustainable sourced paper, have good thermal properties and there are matching award winning compostable lids. Lined with corn starch not plastic, they are completely compostable. Also they only use paper board which is certified sustainable by the Forest Stewardship Council (FSC). There are two big selling points on offering this type of cup, first it is double wall—so even boiling hot drinks will be very well insulated so coffee clutches or double cupping are not required. Second, the complete compostability of both cup and lid offer huge promotional opportunities against your competition—completely compostable cups and lids are unique in the current disposable cup marketplace. The 4oz cup is white and packed in 1000's, the 8oz and 12oz are tan coloured as in the above picture—and are packed on boxes of 500.
